

T1: Construction of Test Collection

- Existing test collections are **not sufficient**
- **New test collections** for performing IR evaluation for systematic review search **is necessary**
- This work published in **SIGIR 2017**

Task 1: Collection

- Aim:
 - Create a **large test collection** that can be made publicly available
- Method:
 - Extract **queries and relevance assessments** (included and excluded studies) from existing systematic reviews
